

Navigate: Calendar Feature

Students use the **Calendar** to see school events. The Calendar is on the **Calendar page** of Navigate360 Student (desktop and mobile). School events must be added by your school.

Feature Overview

The Calendar feature lets students see events created by your school in one place. These events can be filtered by Topics.

Students access the Calendar from the menu in the student app on either Navigate360 Student desktop or mobile.

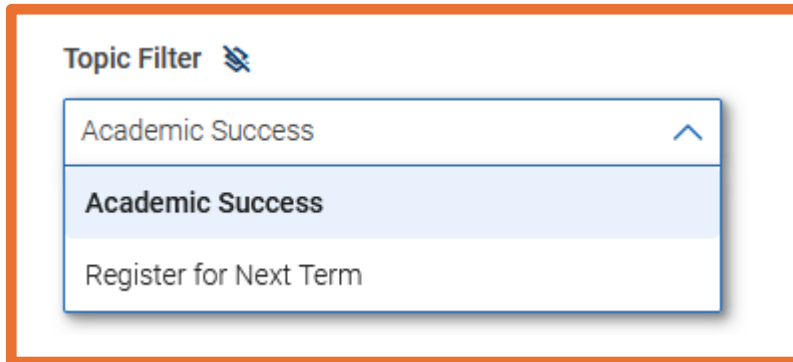

When the student opens the **Calendar** page, a month calendar displays. On mobile, a list of items displays below the month calendar.

The screenshot shows the Navigate360 Calendar interface for January 2025. At the top left, there is a 'Topic Filter' dropdown menu with the text 'Select a topic to filter events'. Below this are navigation arrows and a 'Today' button. The main title is 'January 2025'. To the right of the title is a view selector with four options: 'Month', 'Week', 'Day', and 'List'. The 'Month' view is currently selected. The calendar grid shows the following events:

Sun	Mon	Tue	Wed	Thu	Fri	Sat
29	30	31	1	2	3	
5	6 J-Term 2025 Begins	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27 Spring 2025 Semest...	28	29	30	31	
2	3	4 Spring 2025: Last Da...	5	6	7	8

Students can filter Calendar Items by topics. Note that your school has to either use existing topics or create new Topics for this filter.

Students can also change the calendar view to weekly, daily, or a list. On desktop, students can also display a monthly view.

Note: Only school events show on this Calendar and the content is independent from To-Dos, Events, and Tips content.
