

## **Navigate: Forage Feature**

The newest addition to EAB, [Forage](#), provides students FREE "day-in-the-life" virtual job simulations from leading companies and creates an inclusive path to successful early careers. Forage job simulations help connect students to great jobs by:

- Helping students build real-world job skills that they can add to their resume and/or LinkedIn profile
- Allowing students to explore careers, industries, and companies for FREE, at their own pace and on their own schedule
- Offering simulations from leading companies looking to hire motivated students, like PwC, Goldman Sachs, PepsiCo & more
- More than tripling a student's chance of landing a role

To ensure students have easy access to this free resource, EAB will configure links out to Forage into all Navigate360 Student platforms across July 17 and 18. Forage will be added to Navigate360 Student platforms in the following two locations:

- **Forage as a Main Menu Item:** A Main Menu Item adds a new icon on the desktop and mobile view for all students on their Navigate360 homepage. The new Forage Main Menu Item links directly to the Forage website. If your institution uses a custom Forage landing page and provided that URL to EAB, the link to Forage in your Main Menu Item will be your custom landing page in a custom main menu instead of the generic Forage homepage.
